

Petition Notice To: Legislators of Monroe County

Please put me/(our organization) on record as opposed to Monroe County's mandating forced notification for turf & ornamental pest control applications. The law is undesirable, unworkable, a nuisance, and not necessary in our community.

Homeowner 'do-it-yourselfers' should not be mandated to put up countless signs. Commercial applicators incur costly burdens when trying to notify neighbors 48 hours prior to making pest control applications on their customer's properties.

This makes for intolerable notification requirements that due to weather and other uncontrollable circumstances can hinder timely and appropriate service treatments. Results can have troublesome consequences: environmental landscape appearances may not be so pleasing, and thus real estate property values could suffer. And it could also result in rising health & safety concerns due to more pollen, injurious insects and diseases from poorly maintained properties.

With the county facing a financial crunch, I request that my tax dollars are not spent for this purpose.

Signed_____

Date:_____

P.S.
Please give consideration to a voluntary program for those desiring prior notification for pest control treatments.
