

## **Neighbor Notification Option Waiver**

Regarding our customer at:

To you, the abutting neighbor of our customer: My company may apply pest control (pesticide) treatment(s) to alleviate weed, fungus, and insect infestations in turf and/or ornamentals on their property.

Should you wish, we will provide you with advanced notification prior to any scheduled pesticide application (if made within 150' of your property).

All you need to do is to make your choices below, sign & return this waiver to me.

Please be advised, that non-pesticide applications will be exempt from this notification service (unless requested by you due to special circumstances).

For further awareness, lawn sign markers will also be placed on the treated property to show that a treatment was completed.

### **Thank You.**
